Mechanical Incorporated provided a more redundant and reliable HVAC system for the UW Madison's University Data Center.

Mechanical removed and replaced the entire HVAC central plant for the University Data Center. We also maintained cooling capacity during the entire course of the project.

This building was critical for the entire University payroll system state wide. We could not shut the building down at any time.

The original project schedule was 14 months. Mechanical is proud to say that we pushed the project along and were able to complete the work in just 8 months.
