**Customer:** Freeport School District #145  
**Contract Amount:** \$5,008,500  
**Location:** Freeport, Illinois

During the Summers of 2004 and 2005 Mechanical assisted in bringing Freeport Junior High School up to date with the Illinois Life Safety Code.

Mechanical converted the existing steam boiler to hot water. We removed the existing steam mains in the first floor tunnels and replaced them with new hot water mains in the first floor ceiling. We completed demolition of all existing heat transfer units and replaced them with hot water units. We also installed a new 30 ton chiller for the auditorium.

Work was completed throughout two 80 day work periods during the school's summer break. As a result, staying on schedule was essential for project completion.
