Fax: (847) 973-1169

Customer: Affiliated Construction

Contract Amount: \$1,900,000

Location: Melrose Park, IL

Mechanical worked closely with Affiliated Construction to build new test cells for International Truck and Engine Corporation. The new cells were needed for EPA testing of engines to meet 2007 emissions standards as well as high altitude testing.

We added four chillers, upgraded cooling tower water pumps, and installed all utility piping including steam, condensate, chilled water, tower water, fuel oil, and compressed air and drain piping.

Substantial completion was met on this job by September 2006 with over 17,000 manhours completed.
