Customer: Provena St. Joseph Hospital

Contract Amount: \$2,827,213

Location: Elgin, IL

Mechanical was the plumbing contractor for the addition of Provena St. Joseph Hospital in Elgin, IL. It included Building D on the west end of the existing hospital, which is a four story addition consisting of administration space and 99 new patient rooms. Building C was added on the east end of the hospital consisting of mechanical equipment, expansion and modernization of the birthing center and intensive care unit, additional operating rooms, and two additional cardiac catheterization laboratories.

Our work involved installing underground and above ground plumbing in both buildings. In Building D we installed two water heaters, a city water connection/meter, RPZ, sump pumps, duplex booster system, expansion tanks, and set 542 fixtures. Building C required us to connect existing plumbing lines to provide connections for the new building and install 48 plumbing fixtures.

Our CAD department provided detailed coordination drawings to synchronize our work with other trades.
