**Customer:** Rockford Memorial Hospital

**Contract Amount:** \$954, 000

**Location:** Rockford, IL

Mechanical was the HVAC contractor for the 2007 Rockford Memorial Hospital's 2<sup>nd</sup> and 3<sup>rd</sup> Floor D-Wing upgrades.

Our team installed a new heating hot water distribution system, pipe insulation, test and balance, HVAC control system, and fire penetration system as required for the replacement of the existing system. Also included in the upgrades were new sheet metal, VAV boxes, reheat coils, and radiant panels.

During the upgrades we were required to be in compliance with the hospital standards for infectious control and Illinois life safety standards. We had to monitor our noise during construction as well as allow patient access. Fire prevention was also essential.

The project was expanded during the D3 upgrade to include a remodel of eighteen patient rooms and medical support areas. This included replacing all patient bathroom fixtures and installing new medical gas outlets as well as new plumbing systems for medical support rooms.
